Standard visible security fixings	 mardome surefit		 mardome trade	
Glazing only options (no frills)	 mardome reflex			

Mardome BBA Certificate

The entire Mardome Range is certified by BBA under Agreement certificate number 06/4385. Separate detail sheets of this certificate cover Mardome Ultra and Mardome Glass, Mardome Premier, Mardome Surefit, Mardome Trade and Mardome Reflex. Copies of the certificate are available from our office, or can be downloaded directly from the BBA website at http://www.bbacerts.co.uk/certs/43/4385i1_web.pdf.

Mardome Ultra is a superior range of dome rooflights offering a high level of security with a smooth, clean appearance. The hidden 'lock-bolt' security system reduces the risk of a break-in through the rooflight.

Mardome Premier is a robust range of dome rooflights, constructed with a fully welded, extruded aluminium frame, which secures the glazing to deter vandalism.

Mardome Surefit offers the same 'lock-bolt' security system as **Mardome Ultra**, allowing an accurate and fast installation of the rooflight. The security caps encase each of the rooflight fixings.

Mardome Trade is supplied with pre-drilled glazing for simple installation. The glazing is fixed to the kerb using specially designed security fittings concealing the screws.

Mardome Reflex is a 'glazing only' option specially designed for the refurbishment sector. Mardome Reflex fits over existing kerbs or upstands of varying dimensions.
